

# [emails] Missing e-mail event type in E-mail Log [5.2.0-RC1]

Imported From: [http://groups.google.com/group/in-portal-bugs/browse\\_thread/thread/ee467e4a30dac099#](http://groups.google.com/group/in-portal-bugs/browse_thread/thread/ee467e4a30dac099#)

In-Portal usually have Admin and User e-mail events with same event name, e.g. USER.ADD.PENDING.

We don't show that type in e-mail log and it makes harder to detect which one of them (admin or user) was sent.
