

The "CI Builds" tab in JIRA is empty

The Jenkins integration was created some time ago, where on each commit Jenkins build happens and then it reports back to commit in Phabricator:

- JIRA Issue: **INP-1427** - Don't execute currency-related code during installation **CLOSED**
- Phabricator Commit: <http://qa.in-portal.org/rINP16205>
- Jenkins Build: <http://ci.in-portal.org/job/in-portal-52x/10/>

This however have no effect on "CI Builds" tab on JIRA issue, because it's empty.

Solution

Find how Jenkins is supposed to be integrated with JIRA and configure that.
